

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Single Part Expandable Ad

URL For this Creative

<http://mraid.iab.net/compliance/units/expand.txt>

Goal of Ad

This ad will go through the life-cycle of a typical MRAID expandable ad with orientation support.

This Creative Tests:

MRAID Methods Tested:

- `mraid.addEventListener()`
- `mraid.close()`
- `mraid.expand()`
- `mraid.getCurrentPosition()`
- `mraid.getExpandProperties()`
- `mraid.getScreenSize()`
- `mraid.getState()`
- `mraid.isViewable()`
- `mraid.removeEventListener()`
- `mraid.setOrientationProperties()`

MRAID Events Watched:

- `error`
- `ready`
- `sizeChange`
- `stateChange`

JavaScript Events Watched:

- `window.orientationchange`
- `window.onload`

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Behavior of Ad

Initial/Default State

- Initial placement: 140x50 DIP or higher.
- Ad has a background of #000, color #f00.
- Ad adds listeners for MRAID events. A listener is removed and then added again for stateChange.
- Ad creates a button (span element) and places it inside the created div. It is centered using `mraid.getCurrentPosition`. (See Fig 1)
- Ad responds to rotation event in default state (hooks into `sizeChange` to reposition the div and button).

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

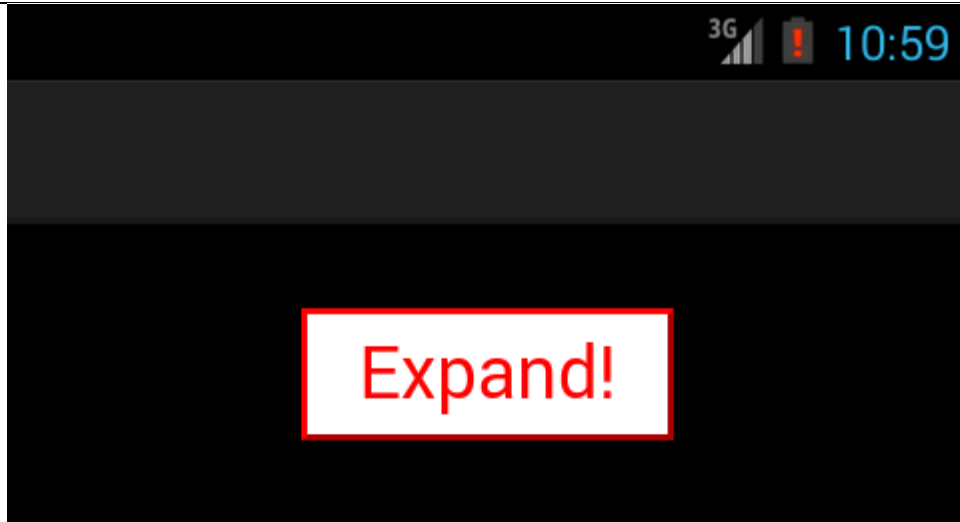

Fig 1 (Portrait) – Default state

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Fig 1 (Landscape) – Default state

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Click "Expand!"

- Ad expands using `mraid.expand()`.
- A div will show and absolutely position itself using the values of `mraid.getCurrentPosition()`. There must be 15px margins on all edges (13px with outline). The div has a white background with red text and a 2px red outline.
- A button (span element) will be added to the bottom of the white div. It will have a black background and red text. This is positioned using `mraid.getCurrentPosition()`. (Fig 2)
- Ad rotates freely and `sizeChange` event will trigger and update to reflow the ad.
- On `width>height`, the button will be disabled and inform the user to rotate to portrait.
- Ad places a placeholder div in the top right to indicate where the SDK close button must be. This div is white with a red X. This area is only an indicator and has no close functionality on its own.
- Expanded ad places a div to show logging messages inline with the ad. This is positioned using CSS only and doesn't use MRAID for positioning. All `console.log` messages from this compliance ad are displayed here.

IAB MRAID2 Expandable
Compliance Ad.
Top and bottom must be equal
margin.
Left and right must be equal
margin.

Lock to Landscape

Fig 2 (Portrait) – Initial expanded state

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

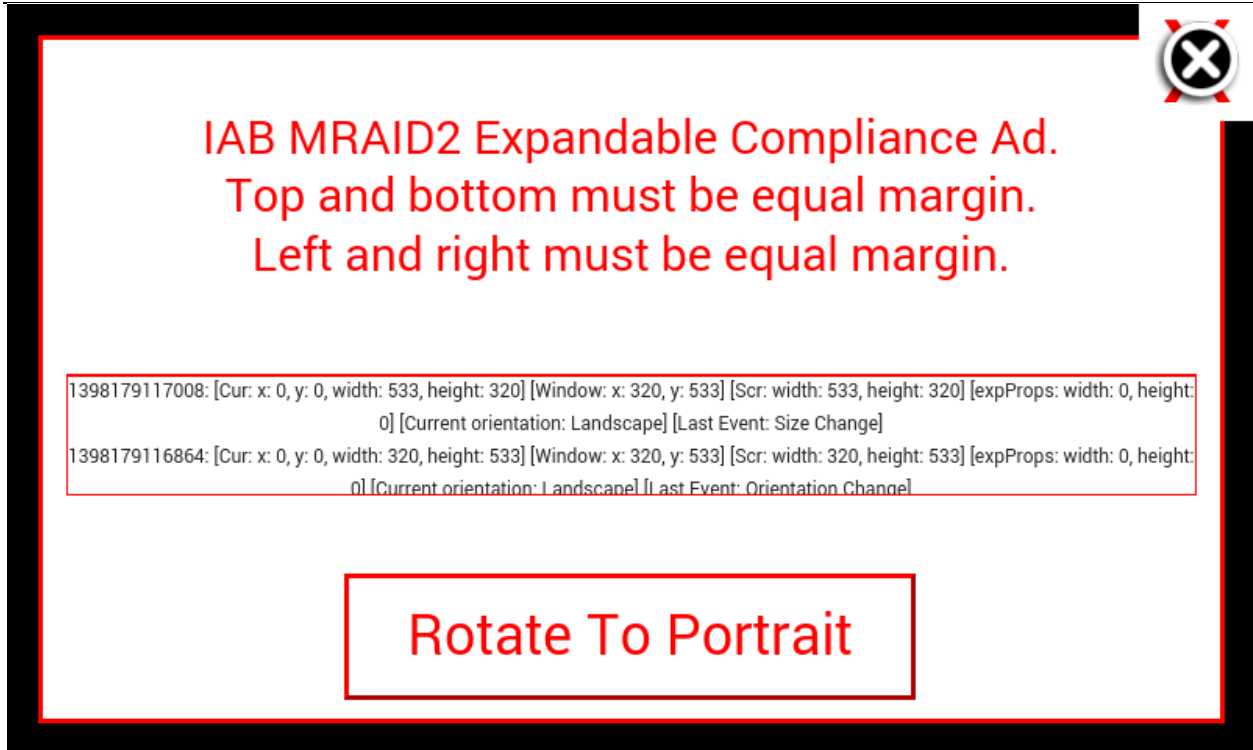

Fig 2 (Landscape) - Initial expanded state

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Click “Lock to Landscape”

- Ad forces orientation to landscape and locks changes.
- Ad watches `mraid.sizeChange()` events for this process.
- White div will position itself according to `mraid.getCurrentPosition` and will remain with the same properties as the previous step.
- Ad removes button and creates another button (span element) located in the same place. (See Fig 3)

```

Lock to Portrait

Fig 3 (Landscape) - Landscape locked orientation

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

Click "Lock to Portrait"

- Ad forces orientation to portrait and leaves the lock unchanged.
- Ad watches `mraid.sizeChange()` event to confirm change.
- White div will position itself according to `mraid.getCurrentPosition` and will remain with the same properties as the previous step.
- Ad removes button and creates another button (span element) located in the same place. (See Fig 4)

MRAID 2 Compliance Checklist

A container/SDK running this test creative must exhibit these behaviors to prove MRAID compliance.

- ✓ **Default View:**
- ✓ Button is centered in webview (width and height).
- ✓ Button keeps centered on sizeChange.
- ✓ Background is black.

Expanded View (Initial):

- ✓ Ad expands to full screen.
- ✓ SDK close area is in top right.
- ✓ SDK close button is above top right red X.
- ✓ White div placed in center of webview (width and height). Equal margins are all side (15px normal with 2px outline).

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

- ✓ Black button is placed near bottom of white div.
- ✓ Orientation change is allowed.
- ✓ On orientation change, white div reflows to new webview size.
- ✓ Rotate to Landscape. White div reflows.
- ✓ In landscape: Button says "Rotate to Portrait".
- ✓ In landscape: Button does not respond.
- ✓ Rotate to Portrait. White div reflows.
- ✓ In Portrait: Button says "Lock to Landscape".
- ✓ In Portrait: Button moves on to next step.
- ✓ SDK close area clicked closes ad back to default state.
- ✓ Debug info: Cur (mraid.getCurrentPosition()), Scr (mraid.getScreenSize()), expProps (mraid.getExpandProperties()) - All widths are equal. All heights are equal.

Expanded View (Landscape Locked):

- ✓ Ad remains in full screen.
- ✓ Device orientation forced to landscape.
- ✓ Device does not honor user orientation changes.
- ✓ White div placed in center of webview (width and height). Equal margins are all side (15px normal with 2px outline).
- ✓ Black button is placed near bottom of white div.
- ✓ SDK close area clicked closes ad back to default state.
- ✓ Debug info: Cur (mraid.getCurrentPosition()), Scr (mraid.getScreenSize()), expProps (mraid.getExpandProperties()) - All widths are equal. All heights are equal.

Expanded View (Portrait Locked):

- ✓ Ad remains in full screen.

IAB MRAID2 TEST AD: SINGLE PART EXPANDABLE AD

- ✓ Device orientation forced to portrait
- ✓ Device does not honor user orientation changes.
- ✓ White div placed in center of webview (width and height). Equal margins are all side (15px normal with 2px outline).
- ✓ Black button is placed near bottom of white div.
- ✓ SDK close area clicked closes ad back to default state.
- ✓ Debug info: Cur (mraid.getCurrentPosition()), Scr (mraid.getScreenSize()), expProps (mraid.getExpandProperties()) - All widths are equal. All heights are equal.

Expanded View (Released):

- ✓ Ad remains in full screen.
- ✓ Device orientation responds to user orientation.
- ✓ White div placed in center of webview (width and height). Equal margins are all side (15px normal with 2px outline).
- ✓ SDK close area clicked closes ad back to default state.
- ✓ Debug info: Cur (mraid.getCurrentPosition()), Scr (mraid.getScreenSize()), expProps (mraid.getExpandProperties()) - All widths are equal. All heights are equal.
