Project Rearc: One Year Later

Tina Lakhani
Head of Ad Tech
IAB UK

Our Mission

Our Digital Infrastructure Is Changing Rapidly

Many digital advertising use cases rely on IDs to link 1st-party audiences.

- These *IDs are increasingly limited*, breaking links between publishers & marketers.
- This impacts *all stakeholders*: consumers, publishers, advertisers, vendors.
- Our industry must *re-architect systems & processes for privacy*.

Project Rearch, One Year Later...

February 2020: IAB & Tech Lab initiated Project Rearch as a global industry effort to focus on standards for **preserving addressability with privacy & accountability.**

July 2020: We joined forces with the **Partnership for Responsible Addressable Media (PRAM)**, adding critical business & policy stakeholders.

Partnership for Responsible Addressable Media

The Process, Industry-Wide...

Phase 1 – Understand the Problem

- Business activities & identifier dependencies
- Business impact from loss of identifiers
- Privacy issues & principles

Phase 2 – Evaluate Technical Alternatives

- Discussion of potential technology-based solutions, including browser/OS proposal analysis
- Definition & application of evaluation criteria – including business & policy considerations
- Selection of proposed alternatives

Phase 3 – Solution Design of Selected Alternatives

- Business & policy requirements
- Minimum standards required, including accountability mechanisms

What have we learned?

- This is **complicated**. #understatement
 - Companies & governments have **many competing approaches** to solutions.
 - There's **no shortage of perspectives**, speculation, **confusion**.
 - There are **no guarantees** – the environment will **continue to evolve**.
- **We can place some bets with confidence...**

Privacy by Default Is the New Normal – Globally

CONSUMERS

- Growing awareness & concerns about the data economy
- Distrust of corporate & political power & institutions

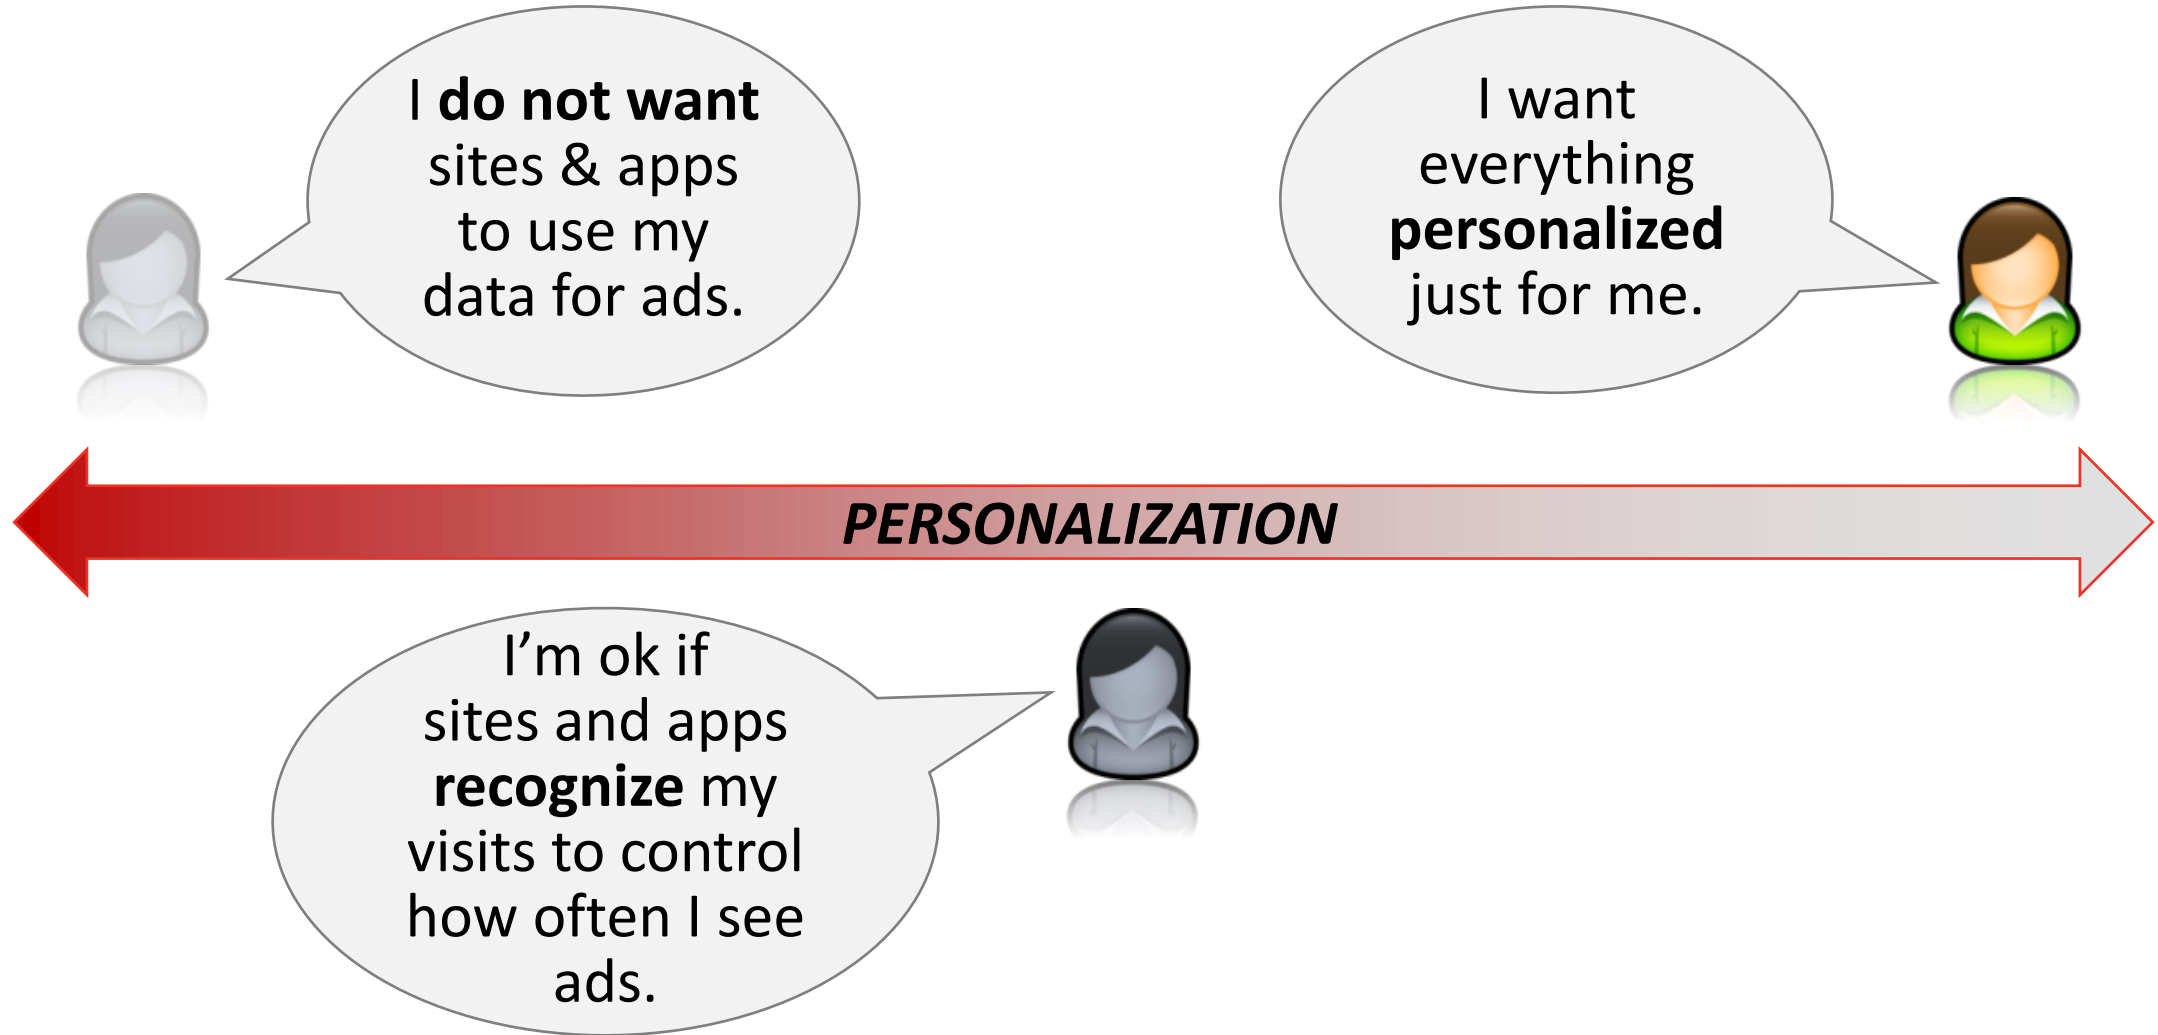

GOVERNMENTS

- Rise of privacy laws globally – many requiring consumer opt-in, all requiring transparency/control
- Legal action against violators

PLATFORMS

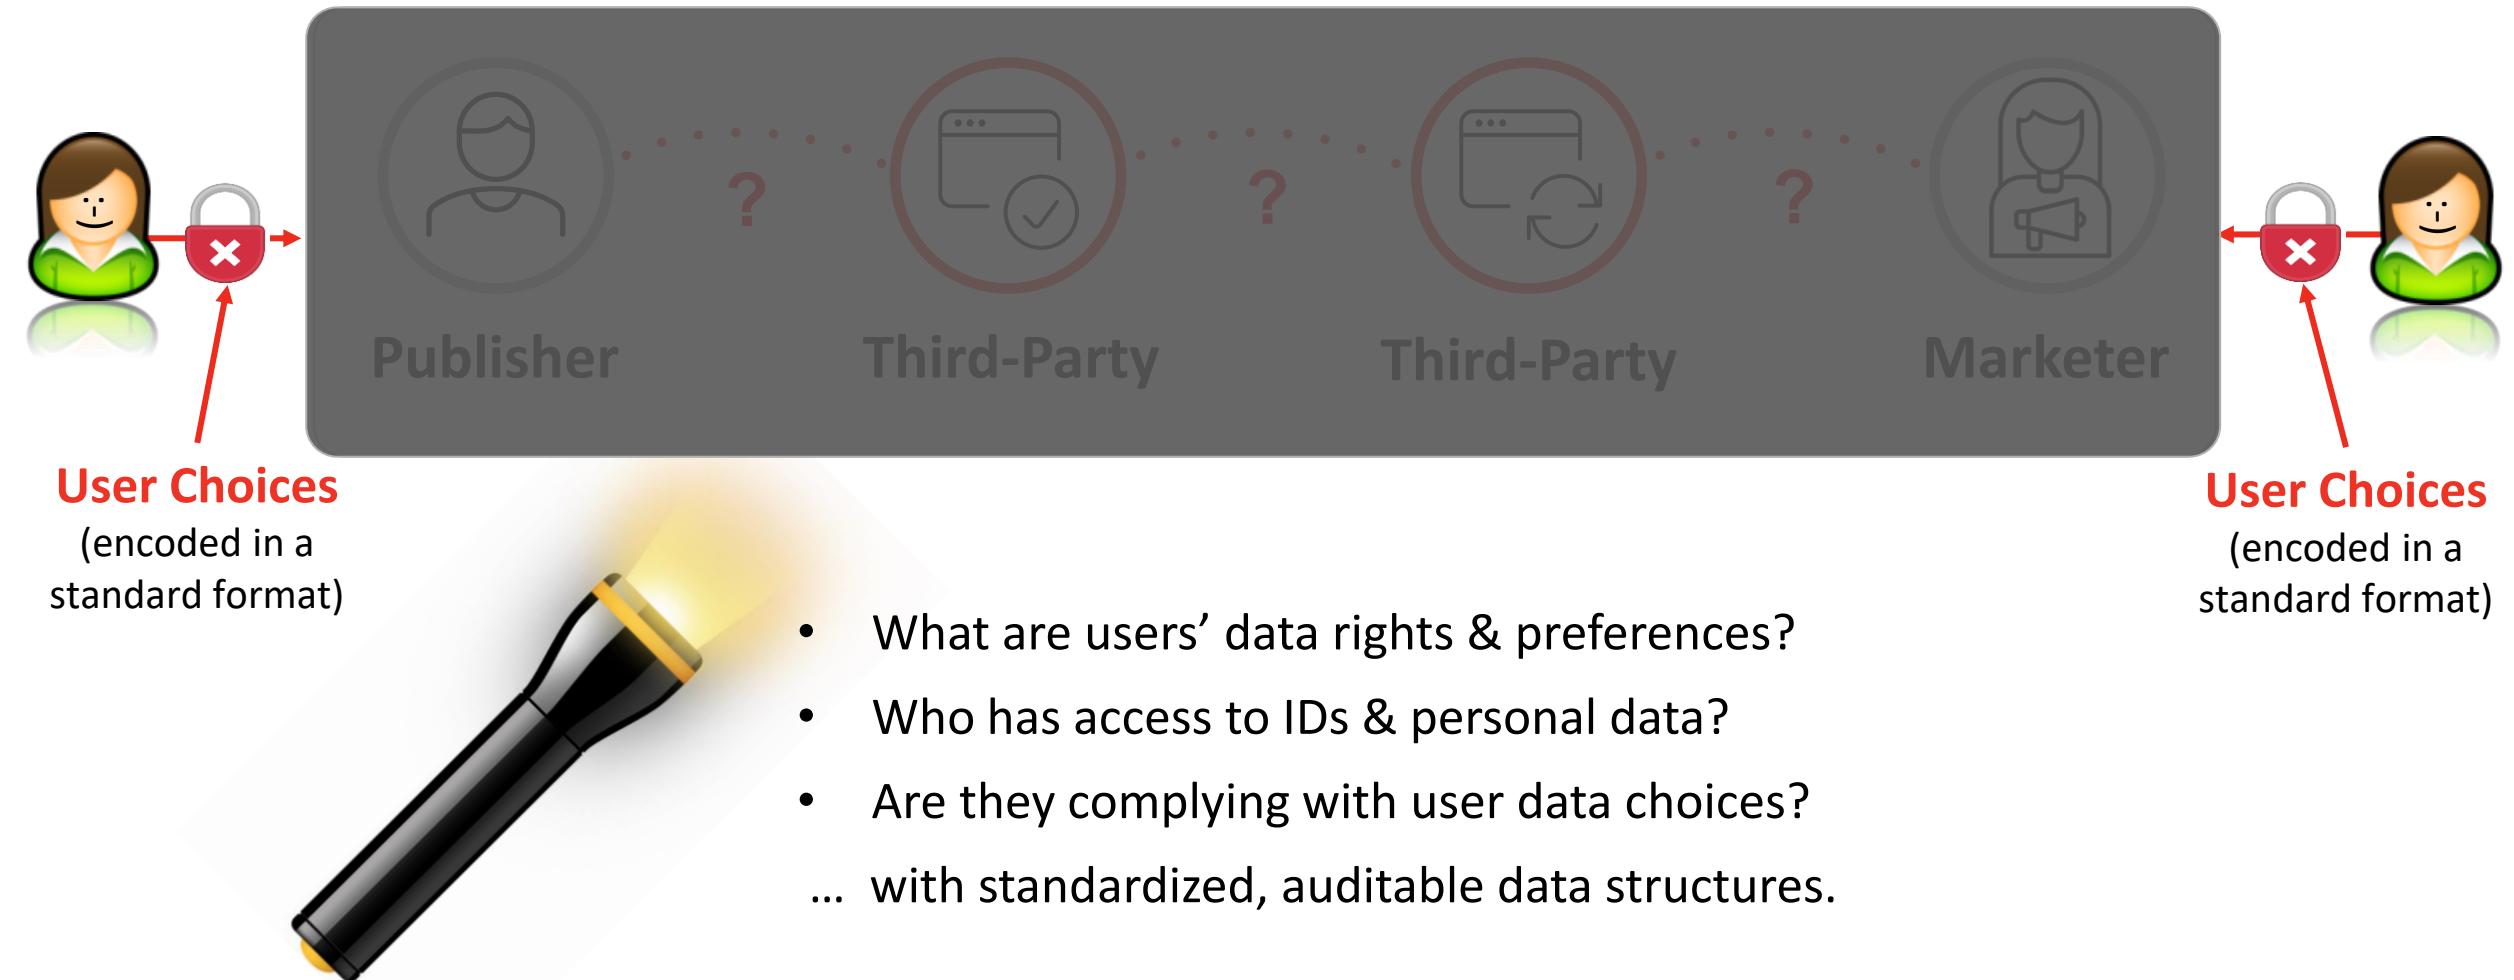

- Browsers & operating systems limiting cookies & IDs globally – taking aim at cross-site tracking
- Largest ad/media platforms revising their practices

The Consumer Is Now in Control

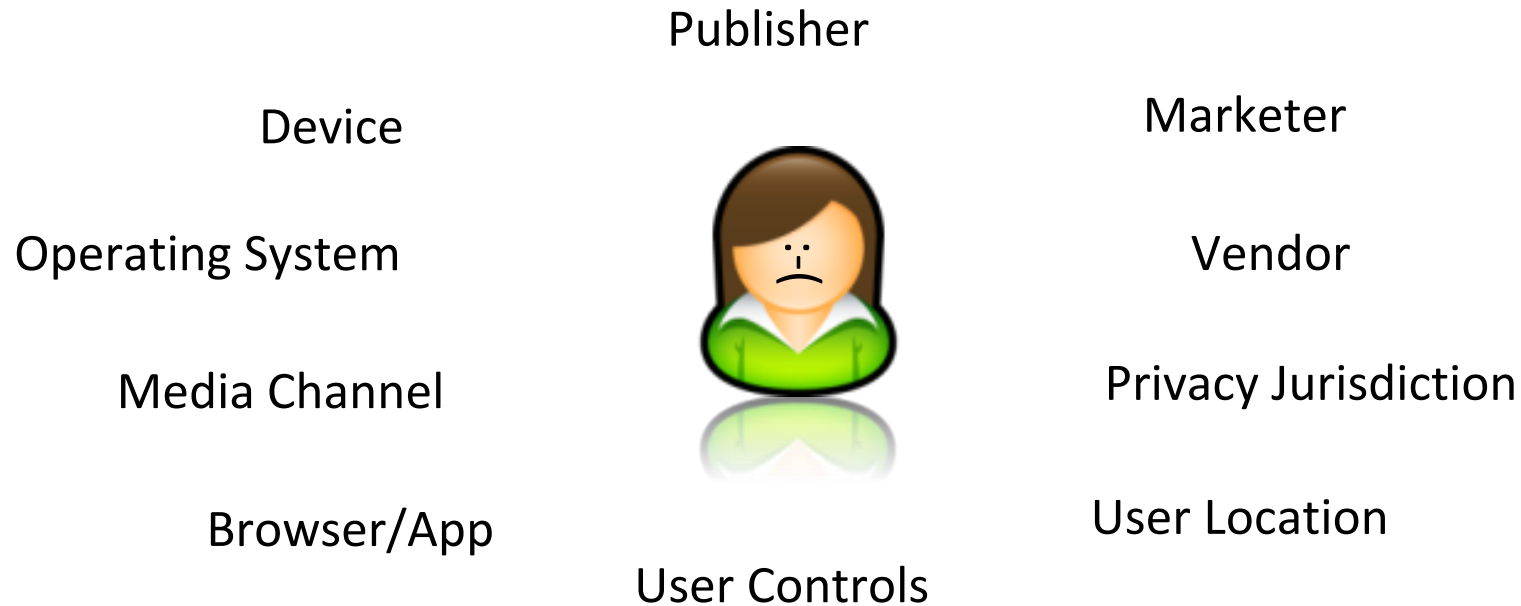

Accountability & Auditability Are Foundational

We must shine a light into the black box of digital advertising.

Open Standards Will Be Critical ... and Will Help ALL Stakeholders

Delivering ad-supported consumer experiences risks becoming too complex.
Ad planning, personalization, delivery, measurement, privacy compliance, etc. can vary by:

Open standards can help enable **predictable user privacy** and the delivery of **responsible ad-supported digital experiences**.

Portfolio Approach to Addressability is Required (No Silver Bullet!)

Plan for a range of scenarios across advertising business activities & use cases:

Unlinked 1st-party Audiences Advertiser/Publisher data not connected

- Contextual
- Seller-defined audiences
- Private marketplaces

Browser/OS-linked Audiences No 3rd-party tracking

- Chrome Privacy Sandbox
- Apple SKAdNetwork & Private Click Measurement

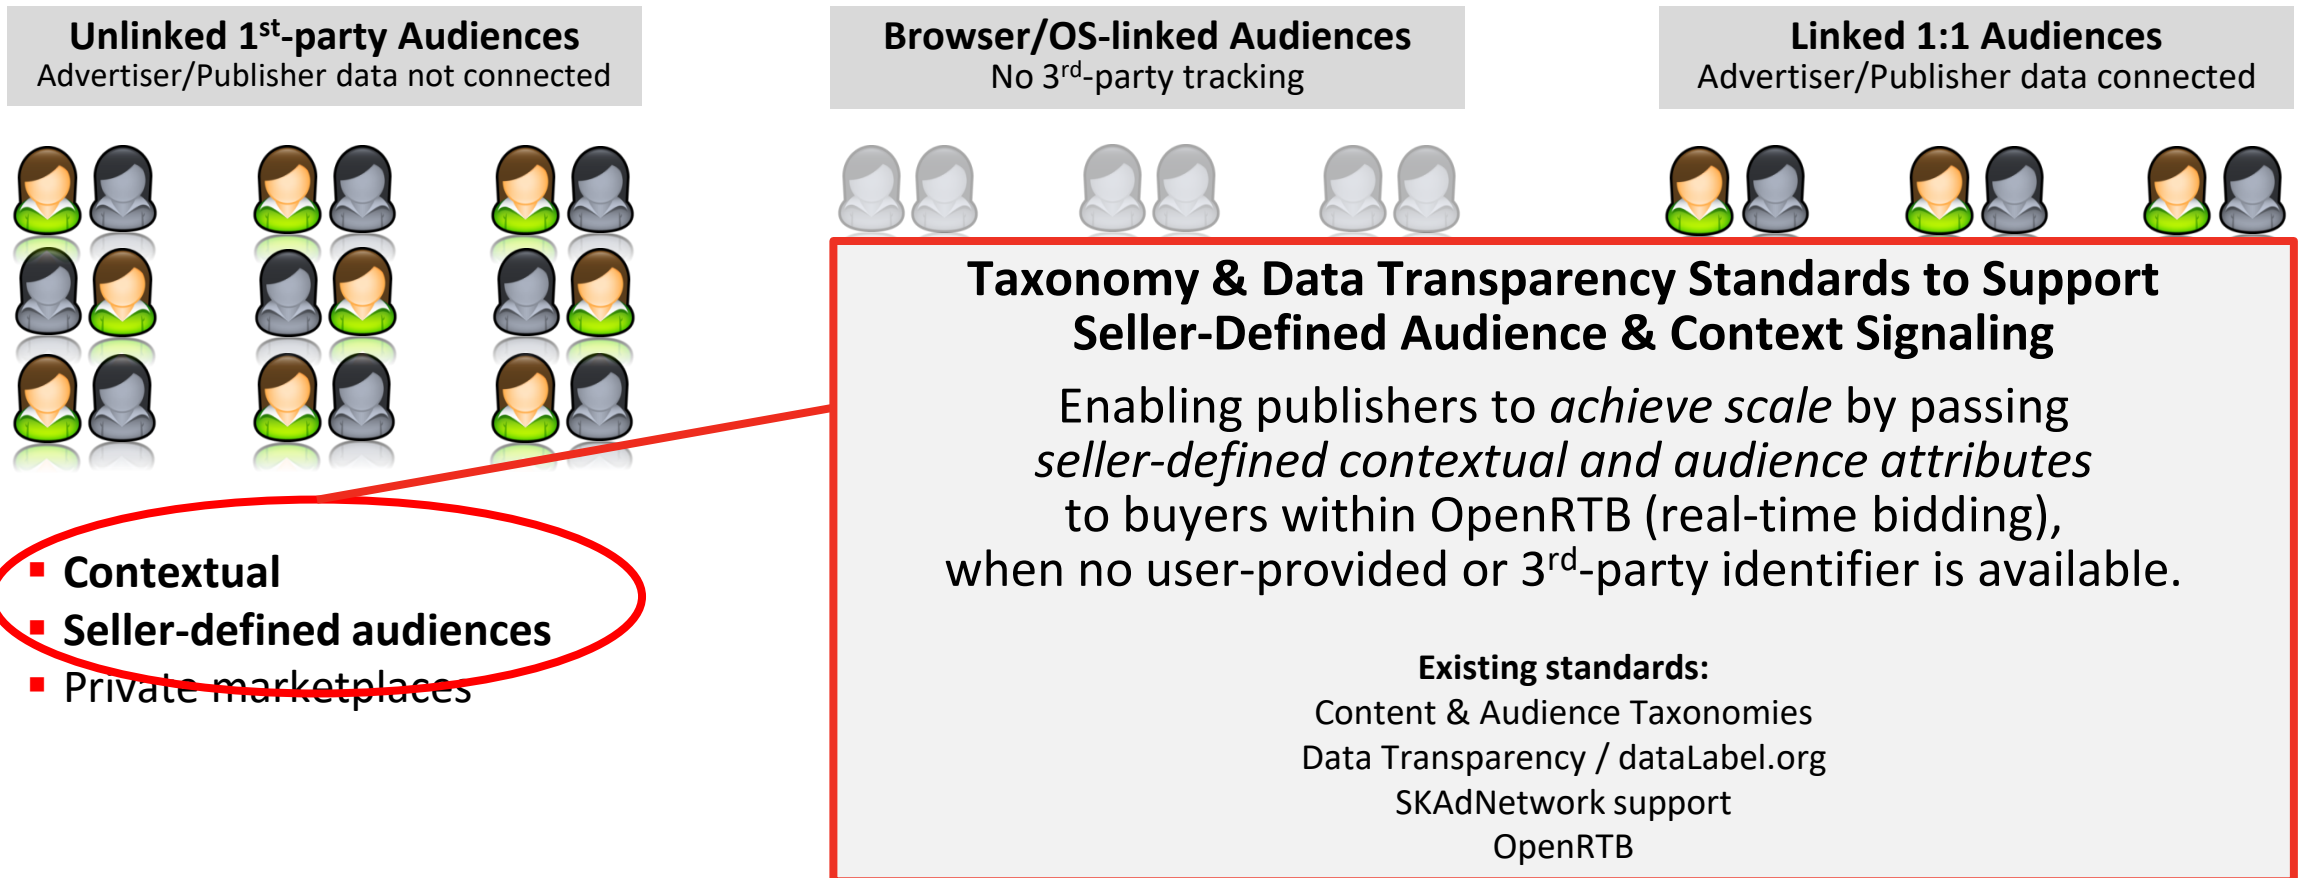

Linked 1:1 Audiences Advertiser/Publisher data connected

- Pre-prompts to earn opt-in to device ID or cookie
- User-enabled IDs
- Clean rooms

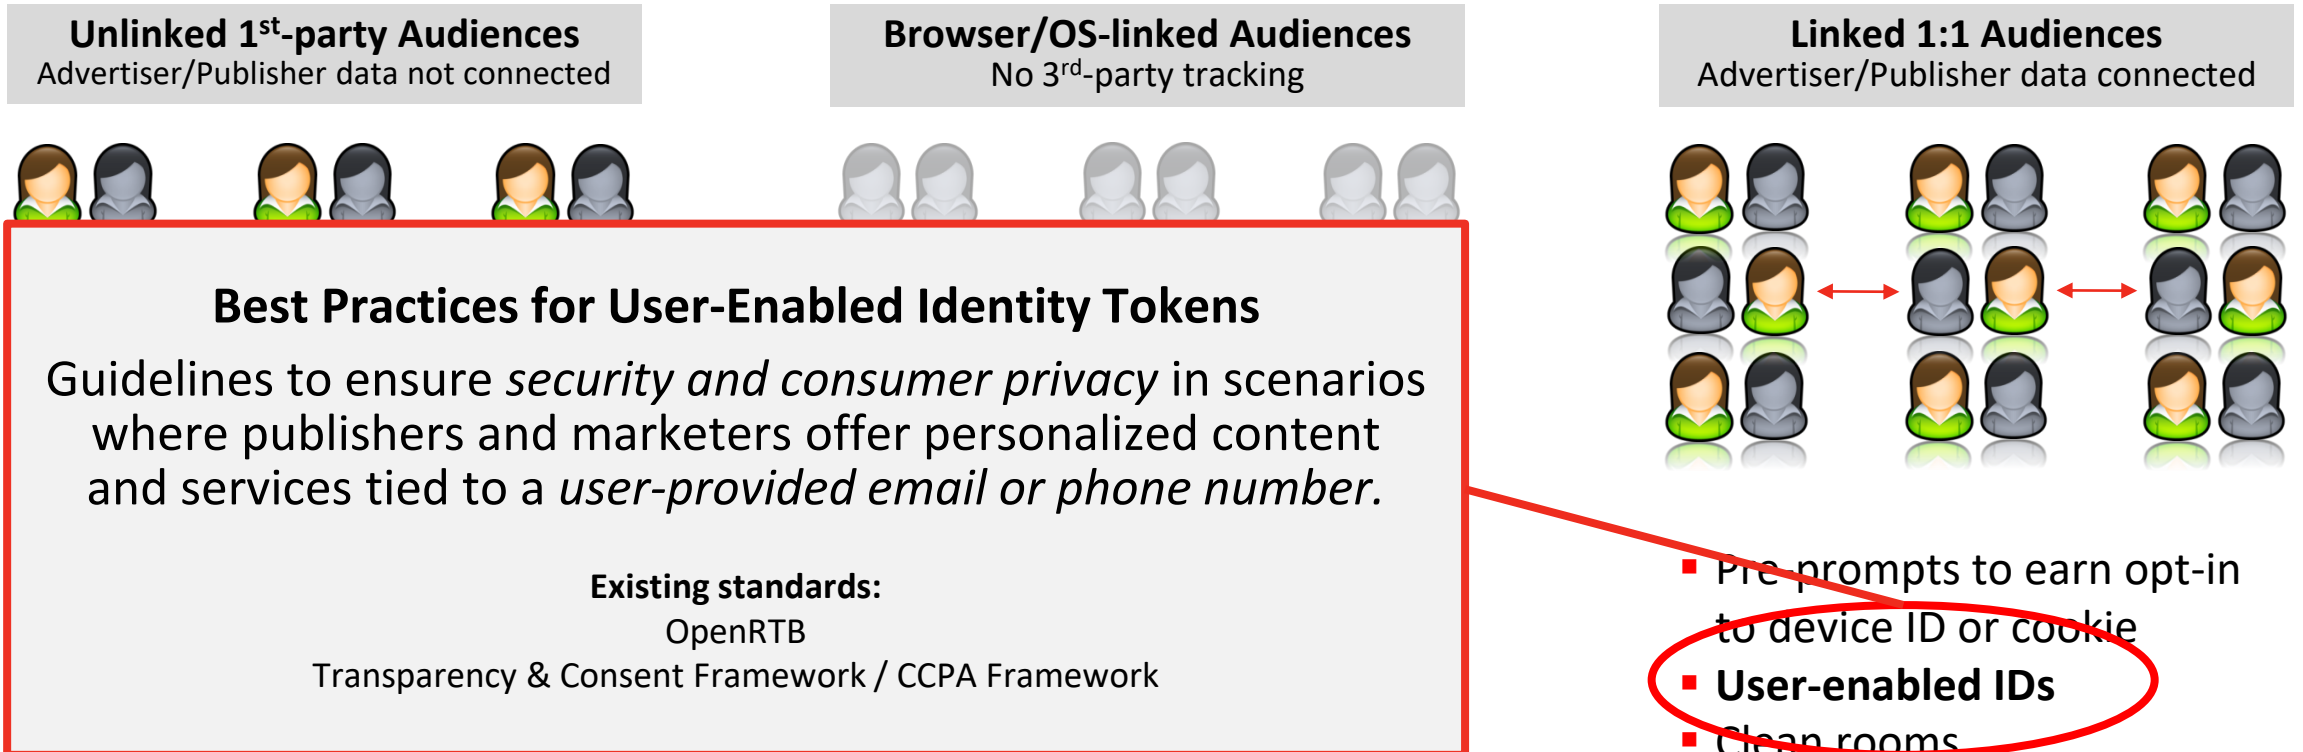

Releases for Comment – Addressability

Plan for a range of scenarios across advertising business activities & use cases:

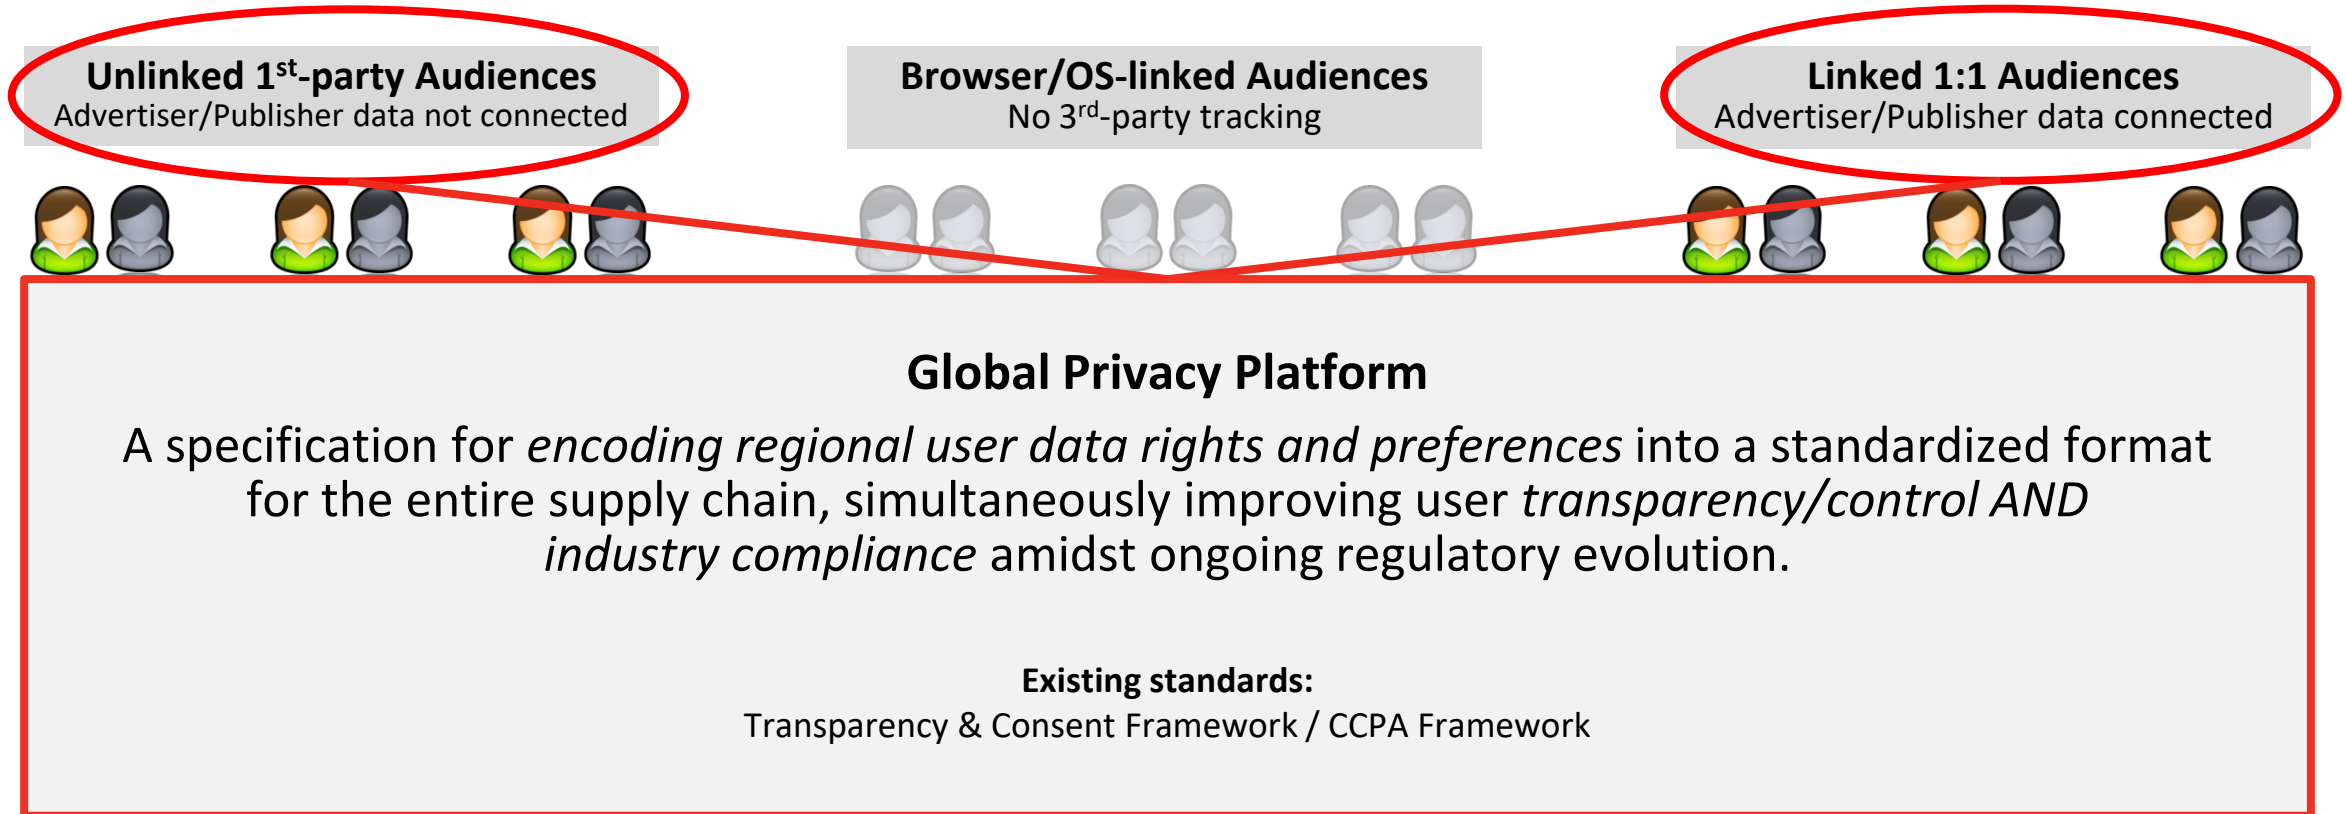

Releases for Comment – Addressability

Plan for a range of scenarios across advertising business activities & use cases:

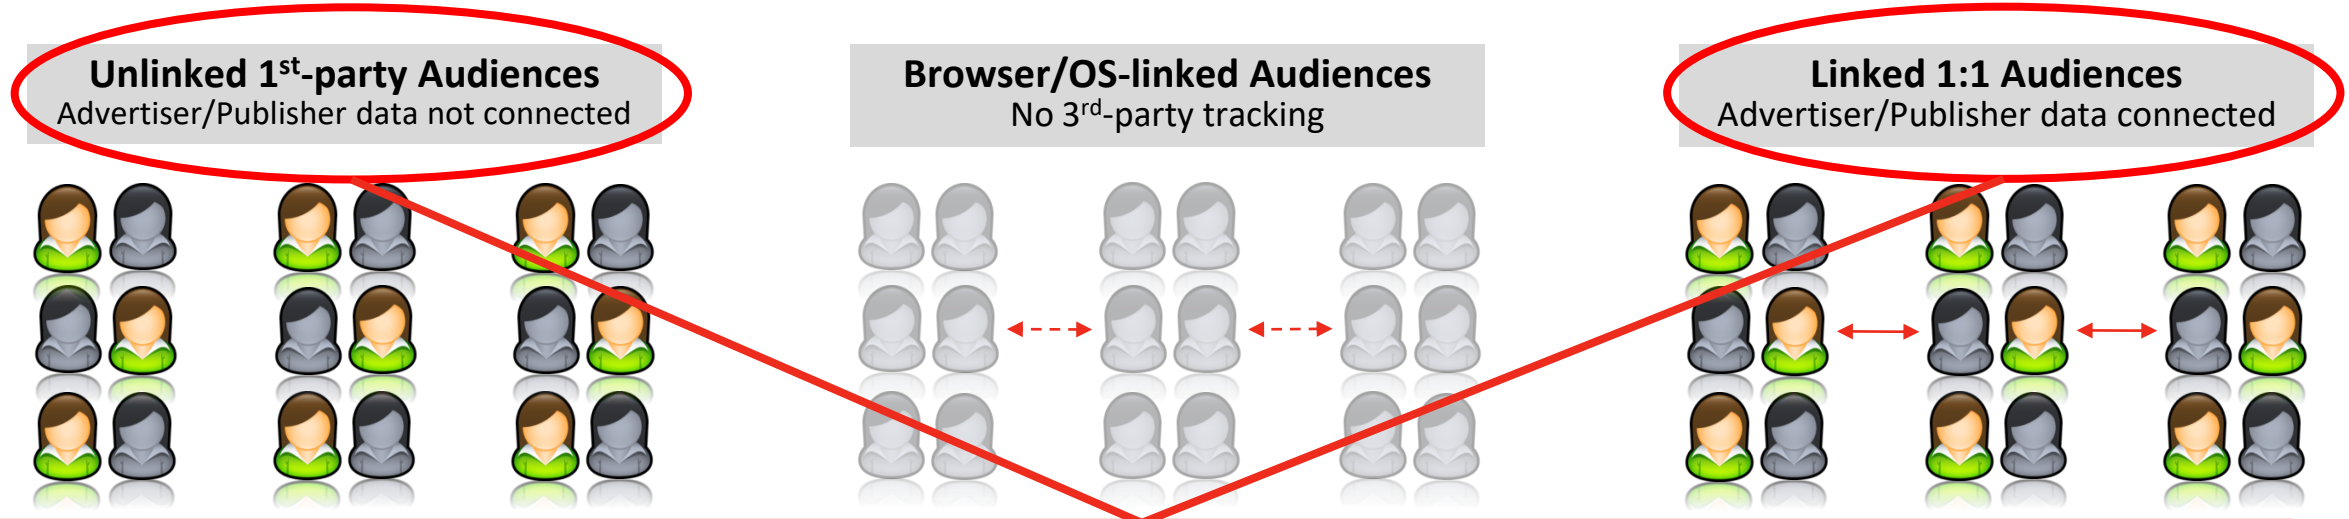

Releases for Comment – Privacy

Plan for a range of scenarios across advertising business activities & use cases:

Releases for Comment – Accountability

Plan for a range of scenarios across advertising business activities & use cases:

Accountability Platform

A specification for open, *auditable data structures and standard practices* to reliably demonstrate digital advertising supply chain *conformity to preferences and restrictions* set by users and the digital properties they visit.

Industry Calls to Action

1. Plan for a *portfolio approach* to addressability scenarios.
2. Provide *feedback* on today's releases: <https://iabtechlab.com/rearc>
 - **Addressability:** (1) *Seller-Defined Audience & Context Signaling*
(2) *User-Enabled Identity Tokens*
 - **Privacy & data protection:** (3) *Global Privacy Platform*
 - **Accountability:** (4) *Accountability Platform*
3. Support *open standards & predictable user privacy*.
Join PRAM and Tech Lab working groups – *more work to be done!*
4. Invest in *consumer engagement*: education, transparency, controls, earning opt-ins.
5. Support *accountability* in 2022 by insisting your partners contribute Accountability Platform data.

Exploring the Role of Accountability Standards
